SOFTWARE DEVELOPER — PROFESSIONAL SUMMARY

Software Developer experienced in building web applications, Salesforce solutions, and blockchain-based applications using React.js, Node.js, JavaScript, and Solidity. Skilled in API integrations, Shopify development, and AI-powered n8n workflows that automate business processes and reduce manual effort.

TECHNICAL SKILLS

Programming & UI: JavaScript, React.js, HTML5, CSS3, Tailwind CSS, responsive design
Backend & Data: Node.js, MySQL, API integrations, application debugging, performance optimization
Platforms & Web3: Salesforce, Shopify, Ethereum, Solidity, smart contracts, decentralized applications (dApps)
Engineering & Automation: Git, functional testing, troubleshooting, n8n, AI-assisted development, AI solution integrations

PROFESSIONAL EXPERIENCE

Salesforce Developer — Growbiz Solutions Inc. | 08/2026 – Present

- Develop and adapt Salesforce functionality to support client business processes, translating requirements into platform solutions and application changes.
- Investigate Salesforce issues, implement fixes, and participate in integration, functional testing, and delivery of updates.

Associate Web Developer — KasWebtech Solutions Pvt. Ltd. | 06/2025 – 08/2026

- Built and maintained React.js and Node.js web applications, developing responsive interfaces and server-side functionality for client projects.
- Created and enhanced Shopify applications and storefront features to address merchant requirements and improve e-commerce workflows.
- Designed n8n automation workflows and integrated AI-enabled merchant solutions to streamline repetitive operational tasks.
- Diagnosed production website defects, implemented client-requested enhancements, and validated fixes before release.

Software Developer Intern — Raymach Technologies | 08/2024 – 02/2025

- Developed a user dashboard with React.js, Node.js, Tailwind CSS, JavaScript, and MySQL used by 1,200+ users; improved session time by 25%.
- Resolved 20+ application bugs and performance issues, contributing to a 15% reduction in page-load time.
- Implemented and refined UI and data-driven functionality through iterative debugging, testing, and performance tuning.

Apprentice Developer — Blockchain / React, Antier Solutions | 07/2023 – 12/2023

- Deployed Ethereum Solidity smart contracts for an NFT platform and executed 60+ test transactions to validate behavior.
- Built React-based NFT listing and wallet interaction interfaces and tested functionality across three device types.
- Developed a lottery dApp processing 100+ unique entries and verified correct winner-selection functionality.

SELECTED PROJECTS

Cognitive Focus — AI-assisted Web App | Live Demo

Built and deployed a browser-based focus-sequence challenge using AI-assisted development; designed interactive exercises for practicing attention, working memory, and sequencing.

NFT Marketplace — React.js, Node.js, Solidity, Ethereum

Developed NFT listing and transaction flows backed by Solidity contracts; performed 10 functional test cases for application behavior.

Restaurant Website — HTML, CSS, JavaScript, React.js

Implemented interactive, mobile-responsive pages and reusable UI elements; checked functionality across browsers.

EDUCATION

B.Tech, Computer Science & Engineering — Chitkara University | 2020–2024 | CGPA: 8.82
